## Manage Matrix

[Configure System](#)

Configure global settings and paths.

[Reload Configuration from Disk](#)

Discard all the loaded data in memory and reload everything from file system. Useful when you modified config files directly on disk.

[Manage Plugins](#)

Add, remove, disable or enable plugins that can extend the functionality of Matrix.

[System Information](#)

Displays various environmental information to assist trouble-shooting.

[System Log](#)

System log captures output from java.util.logging output related to Matrix.

[Load Statistics](#)

Check your resource utilization and see if you need more computers for your builds.

[Matrix CLI](#)

Access/manage Matrix from your shell, or from your script.

[Script Console](#)

Executes arbitrary script for administration/trouble-shooting/diagnostics.

[Manage Nodes](#)

Add, remove, control and monitor the various nodes that Matrix runs jobs on.

[About Sonatype Matrix Professional](#)

Sonatype Matrix Professional product information.

[Prepare for Shutdown](#)

Stops executing new builds, so that the system can be eventually shut down safely.
